SBR™

BLU Ecosystem™
Wireless lighting control system.

INTRODUCTION

The SBR™ ™ is a feature rich and affordable wireless handheld remote (2x AAA batteries not included). It provides users a simple and intuitive interface to access the full potential of the BLU Ecosystem. Users can turn on to full bright or full off, adjust color temperature (where offered), dim up and down, choose from 4 scene presets or return to default automation settings. After install, simply download the SMART BLU™ CLOUD App to associate BLU Ecosystem™ lights to the switch. Applications include classrooms, offices, hallways, washrooms, etc… A perfect choice for architects, engineers, contractors and end users.
